SECRETARY'S REPORT RE MODERN SCHOOL .-

The Secretary reported verbally the result of an interview with the Principal of the Modern School, Mr. J. Parsons, - the main features of the report were as under:-

- 1. The Principal disclaimed any partisanship in connection with the respective codes, and stated that the adoption of the British game was in pursuance of the tradition established by the former Principal.
- 2. The last named gentleman was a keen supporter of the Australian game and thought it necessary, as a matter of expediency, to adopt the Soccer Code for the boys.
- 3. The reasons for this introduction were given as follows:-
 - (a) The other secondary schools had refused to meet the Modern School boys in competitions, thus debarring them from being able to particip te in premiership contests.
 - (b) The numerical strength of Soccertins being only eleven enabled the arrangement of internal --- premiership matches between the different divisions of the school, whereas this was impossible under the Australian game, requiring as it does eighteen players.
- 4. Mr. Parsons stated that if the League could offer a promise that if the present code was changed the lads would be --- be allowed to take part in the secondary school competition the question could be brought up for reconsideration, but unless the League had some such advantage to submit, no alteration in the policy of the School could be thought of.

Mr. Boas moved that the Executive of the League wait on the Secondary Schools Association and endeavour to persuade them to allow the Modern School to compete with their Association.
